

Tools from BEKA At all times the right choice

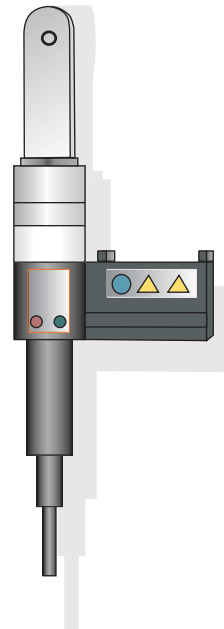

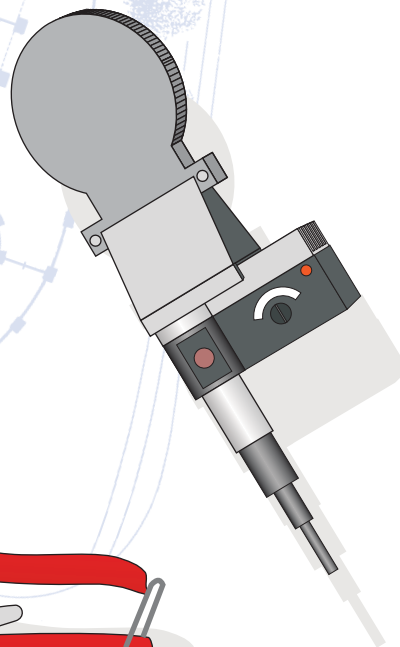

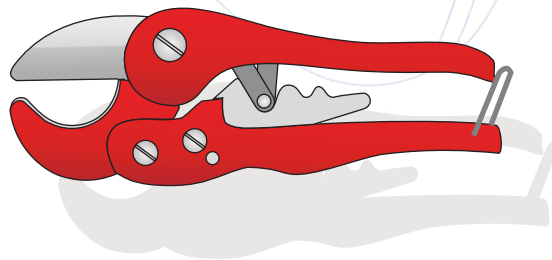

For installation BEKA offers an assortment of tools. Butt - and sleeve welding devices as well as internal sleeve welding plates are available for the different diameters.

Special scissors for BEKA pipe DA20 assure safe and accurate cuts. The above mentioned tools are available from regular stock in short term.

Please contact us in case of further requests of tools or technical instructions. More advises and information are explained in the BEKA TI-M specification sheets.

Regular controls on incoming and outgoing goods as well as 15 years warranty on all BEKA products secure a steady high quality.

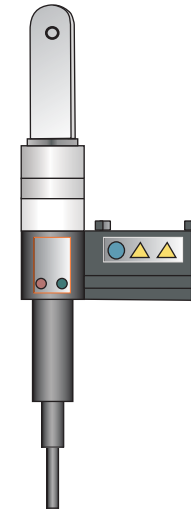

15 years
warranty

W.MSG.1 *Hand Welding Device for Sleeve Welding*

Material	Metal
Input voltage	230 V
Heating capacity	500 W
Temp. regulating range	200°C- 300°C self regulating via thermostat
Extent of delivery:	Sleeve welding device with holding device for table fixing.
Description:	Hand welding device with table-hold for sleeve welds. Suitable for welding adaptor from Ø20 mm up to Ø32 mm.

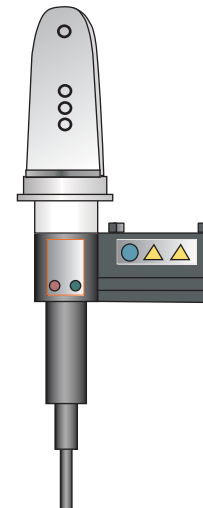

Ordering example:
Hand Welding Device: [W.MSG.1](#)

W.MSG.2 *Hand Welding Device for Sleeve Welding*

Material	Metal
Input voltage	230 V
Heating capacity	800 W
Temp. regulating range	200° C- 300°C self regulating via thermostat
Extent of delivery:	Sleeve welding device with holding device for table fixing.
Description:	Hand welding device with table-hold for sleeve welds. Suitable for welding adaptor from Ø20 mm up to Ø63 mm.

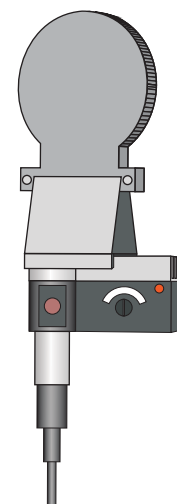

Ordering example:
Hand Welding Device: [W.MSG.2](#)

Welding devices with other capacities are available per your inquiry.

W.STSG.1 *Butt-Welding Device*

Material	Welding adaptor with PTFE-silver coating
Input voltage	230 V
Heating capacity	600 W
Temp. regulating range:	200°C - 300°C self-regulating via thermostat
Extent of delivery:	Butt-welding device with holding device for table fixing.
Description:	Hand welding device for butt-welds. Suitable for all BEKA pipes and mats.

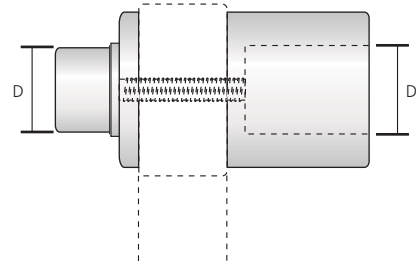

Ordering example:
Hand Welding Device for butt-welds: [W.STG.1](#)

Deviations of the illustration are possible.

W.MSE **Sleeve Welding Adaptor**

Material	Metal, PTFE-Silver-coated
Diameter (D)	20 mm
Description	Sleeve welding adaptor for BEKA sleeves and pipes with outer diameter of 20 mm. Accessory for sleeve welding device W.MSG

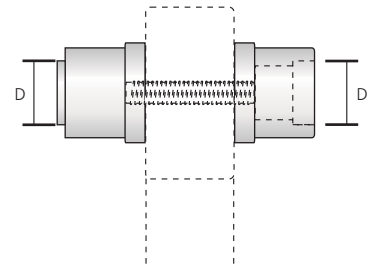

Ordering example:

 Sleeve Welding Adaptor for 20mm pipe: [W.MSE.20](#)

Welding Devices for sleeve welds with bigger dimensions are available per your inquiry.

W.IMSE **Inside Sleeve Welding Adaptor**

Material	Metal, PTFE-Silver coated
Diameter (D)	16 mm
Description:	Inside sleeve welding adaptor for BEKA end caps and pipes with an inside diameter of 16 mm. Accessory for sleeve welding device W.MSG

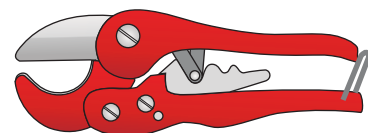

Ordering example:

 Inside Sleeve Welding Adaptor for 20 mm pipe: [W.IMSE.20](#)

Welding devices for saddle welds are available per your inquiry.

W.S.20 **Scissors**

Material	Metal
Cutting range	up to \varnothing 26 mm
Colour	red
Description:	Scissors to cut BEKA pipes up to \varnothing 26 m

Ordering example:

 Scissors: [W.S.20](#)

Special devices for welding synthetic material are available per your inquiry.

Deviations of the illustration are possible.
