

For the optimal mounting: Tools from BEKA

BEKA offers a range of tools for the the installation of BEKA products.

Butt and sleeve welding devices as well as internal sleeve welding plates are available for the different diameters. There are special scissors for cutting BEKA pipe DA20. The listed tools are supplied in short term from regular stock. Please contact us for any other tool requirements.

Instructions for the use of the tools are given in the BEKA technical information sheets TI-M.

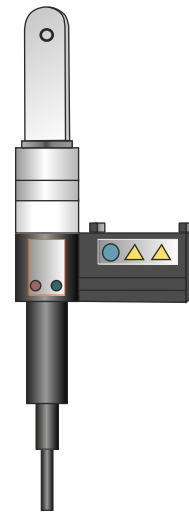

Regular incoming and outgoing goods inspections as well as a 15 year warranty on all BEKA products ensure the constant high quality.

W.MSG.1 | Hand Welding Device for Sleeve Welding

Material	Metal
Input voltage Heating capacity Temperature regulating range	230 V 500 W 200°C - 300°C self-regulating via Thermostat
Extent of delivery	Sleeve welding device with holding device for table fixing. Delivery with Sheet-steelcase without welding adaptors.
Description	Hand welding device for Sleeve welds. Suitable for welding adaptor from \varnothing 20mm to 32 mm.

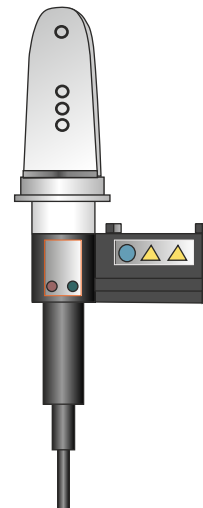

Ordering example:
Hand Welding Device: W.MSG.1

W.MSG.2 | Hand Welding Device for Sleeve Welding

Material	Metal
Input voltage Heating capacity Temperature regulating range	230 V 800 W 200°C - 300°C self-regulating via Thermostat
Extent of delivery	Sleeve welding device with holding device for table fixing. Delivery with Sheet-steelcase without welding adaptor.
Description	Hand welding device for Sleeve welds. Suitable for welding adaptors from \varnothing 20mm to 63 mm.

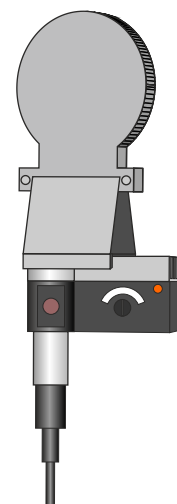

Ordering example:
Hand Welding Device: W.MSG.2

W.STSG.1 | Butt-Welding Device

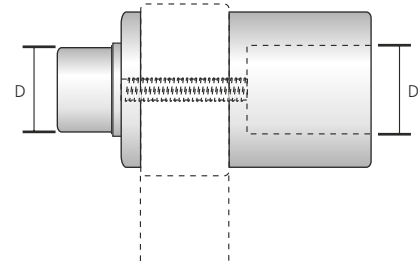

Material	Metall
Input voltage Heating capacity Temperature regulating range	230 V 600 W 200°C - 300°C self-regulating via Thermostat
Extent of delivery	Hand welding device for butt-welding with table fixing. Sheet-steelcase possible for surcharge.
Description	Hand welding device for Butt-welding. Suitable for all BEKA pipes and mats.

Ordering example:
Hand Welding Device for butt-welding: W.STSG.1

W.MSE | Sleeve welding adaptor

Material	Metal, PTFE-Silver-coated
Diameter (D)	20 mm
Description	Sleeve welding adaptor for BEKA Sleeves and Pipes

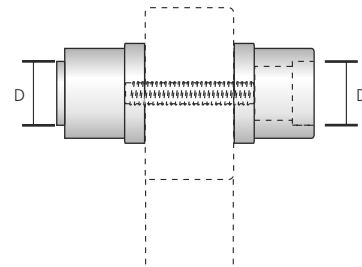

Ordering example:
Sleeve welding adaptor for 20 mm pipe: W.MSE.20

Welding adaptors for sleeve welding in larger dimensions are available on request.

W.IMSE | Inside Sleeve Welding Adaptor

Material	Metal, PTFE-Silver-coated
Diameter (D)	16 mm
Description	Inside sleeve welding adaptor for BEKA endcaps and pipes with inside diameter of 16 mm. Accessory to Hand welding device for sleeve welding W.MSG

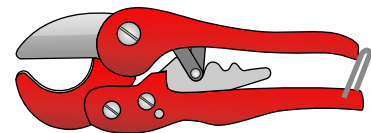

Ordering example:
Inside Sleeve Welding Adaptor for 20 mm pipe: W.IMSE.20

Welding adaptors for Saddle welding are available on request.

W.S.20 | Scissors

Material	Metal
Cutting range	up to \varnothing 26 mm
Colour	red
Description	Scissors to cut BEKA Pipes up to \varnothing 26 mm

Ordering example:
Scissors: W.S.20

Special devices for welding synthetic material are available on request.

W.L.1 | solve tool

Material	Stainless steel
Diameter (D)	10 mm
Description	Disassembly tool for removing flexible hoses in plug-in connectors

Ordering example:
solve tool: W.L.1
